Technical Skills

Programming Languages:	Operating Systems:	Database Systems:	Network Technologies:
C#*, SQL, Java*, C/C++*, PHP	Windows, UNIX	MYSQL*	TCP/IP
Python, JavaScript*, HTML*	Mac OS, Android		

Education

Bachelor of Science, Computer Science & Systems, University of Washington, Tacoma, WA, June 2017
GPA 3.46

Projects

Tetris in Java – Built a Tetris game in Java. The game heavily relied on objected-oriented designs with a graphical user interface, events, and animations.
https://github.com/mohibkohi/Tetris

Compressed Literature in Java – Implemented Huffman's coding algorithm, Priority Queue, and Hash Table to compress messages in order to increase efficiency and capacity**.**

Student Database in JavaScript and Jade using SQL database – Collaborated to build a website that adds, edits, identifies, and generates secure student reports for authorized users of the faculty.

Game of Trine in JavaScript and HTML – Collaborated to build a web-based arcade game. I was involved in the creation of characters, user interface, storyline, and gameplay.
https://thaijaso.github.io/gameoftrine/

Cloud Computing in Amazon Web Services Cloud (AWS) – Conducted a large-scale study of Amazon RDS and implemented data to Amazon's RDS PostgreSQL and RDS MySQL to compare cost, storage, security, and usability.

Professional Experience

Office Assistant, Shoreline Community College, April 2018-present
- Assist in preparing, formatting and maintaining multiple confidential records, including student files, forms and communication records
